

Mangolint

Fighting Language Death Through Brand Authenticity

AI-Powered Cultural Linguistics Linter

The Crisis

2019 - UN Year of Indigenous Languages

- **40% of 7,000 languages** are endangered
- **One language dies every 2 weeks**
- English homogenization erases cultural diversity

Our Mission: Slow language death by putting indigenous terms on product labels

The Opportunity

\$2 Trillion CPG Market Needs This

Brand Managers Want:

- Cultural authenticity for premium pricing
- Connection with diverse consumers
- Avoid costly appropriation mistakes

Current Solution: \$320-600 per ingredient (2-4 hours research)

Mangolint: \$0.01 per analysis (5 seconds)

Our Journey

Team Collaboration & Learning

What We Mastered:

- Git & GitHub workflows from scratch
- Version control best practices
- Kiro AI for rapid development

Result: Production-ready tool built collaboratively in record time

How It Works

Amazon Bedrock Claude 3 acts as Indigenous Linguist & Brand Anthropologist

Live Demo

Input:

Our pizza uses mushrooms, peppers, and onions

Output:

Our pizza uses hongos (mushrooms), chiles (peppers), and cebollas (onions) – celebrating traditional heritage

Plus: Full cultural context, traditional uses, authenticity markers

Key Features

- ✓
 - **Instant Analysis** - 5 seconds vs 2-4 hours
- ✓
 - **50+ Languages** - Indigenous terms from global cultures
- ✓
 - **Brand Statements** - AI-generated marketing copy
- ✓
 - **Interactive UI** - Hover tooltips, copy-paste ready
- ✓
 - **99% Cost Savings** - \$0.01 vs \$320-600

Real Impact

Every Product Label Matters

When "turmeric" becomes "haldi" (Hindi):

- Language stays alive in commerce
- Cultural knowledge preserved
- Children learn traditional terms
- Communities maintain identity

Scale: 1 CPG brand = millions of labels = massive language exposure

Go-Forward: Browser Extension

Phase 1 (Now): Web Application

Phase 2 (Next): Browser Extension

Vision: Linter dropdown like spell-check

1. Type "turmeric" in any text field
2. Mangolint underlines it
3. Dropdown shows: haldi, manjal, pasupu
4. Select term for your market

Phase 3: Product Integration - OCR & barcode scanning to generate culturally significant brand marketing from existing products

Business Model

Sustainable & Scalable

Pricing:

- Starter: \$99/month (1,000 analyses)
- Professional: \$499/month (10,000 analyses)
- Enterprise: Custom (unlimited + API)

Target: 100 brands = \$50K MRR

Infrastructure: < \$500/month

Gross Margin: 99%

Call to Action

Join Us in Fighting Language Death

Next Steps:

- Try the demo: <http://localhost:5001>
- Pilot program for CPG brands
- Investment opportunities

Together we can save languages while building profitable brands

Thank You!
